

## PLEISTOCENE LAND SNAILS FROM MUDDY CREEK, MISSISSIPPI

LESLIE HUBRICHT

3235 - 23rd. Ave., Meridian, Miss., 39303

The Pleistocene deposit reported here was discovered after my two papers on the Pleistocene land snails of Mississippi were published (STERKIANA 3: 11-14; 8: 1-11). This locality is a silt deposit on Muddy Creek, beneath the bridge, 3 miles northwest of Bovina, Warren County, Mississippi. It contains large numbers of aquatic snails, of which *Amnicola in-*

*tegra* (Say) is the dominant species, fossil wood and spruce needles, and ostracods. The land snails were not well preserved, and most of the larger shells were reduced to unidentifiable fragments.

The number following the name is the number of specimens collected.

<i>Stenotrema barbatum</i> (Clapp)	5	<i>Punctum minutissimum</i> (Lea)	38
<i>Stenotrema leai aliciae</i> (Pilsbry)	1	<i>Gastrocopta contracta</i> (Say)	20
<i>Allogona profunda</i> (Say)	1	<i>Gastrocopta pentodon</i> (Say)	17
<i>Haplotrema concavum</i> (Say)	4	<i>Gastrocopta tappaniana</i> (C.B. Adams)	12
<i>Euconulus fulvus</i> (Müller)	2	<i>Vertigo milium</i> (Gould)	15
<i>Guppya sterkii</i> (Dall)	14	<i>Vertigo</i> , n. sp.	1
<i>Glyphyalinia solida</i> (H. B. Baker)	6	<i>Vertigo tridentata</i> (Wolf)	6
<i>Paravitrea multidentata</i> (Binney)	2	<i>Vertigo gouldi</i> (Binney)	3
<i>Hawaiiia minuscula</i> (Binney)	5	<i>Columella edentula</i> (Draparnaud)	1
<i>Zonitoides arboreus</i> (Say)	1	<i>Vallonia parvula</i> Sterki	1
<i>Zonitoides lateumbilicatus</i> (Pilsbry)	1	<i>Cionella morseana</i> Doherty	2
<i>Striatura exigua</i> (Stimpson)	3	<i>Carychium exiguum</i> (Say)	33
<i>Deroceras laeve</i> (Müller)	20	<i>Carychium exile</i> H. C. Lea	18
<i>Helicodiscus notius</i> Hubricht	9	<i>Helicina orbiculata</i> (Say)	1
<i>Helicodiscus intermedius</i> Morrison	17	<i>Pomatiopsis lapidaria</i> (Say)	106
<i>Helicodiscus jacksoni</i> Hubricht	49	Snail egg ( <i>Haplotrema</i> ?)	1
